## **Dissolved Gas Concentration in Water: Computation as Functions of Temperature, Salinity and Pressure** John Colt

Aquacultural, oceanographic, and fisheries engineering, as well as other disciplines, require gas solubility data to compute the equilibrium concentration. These calculations, for example, can affect the output of aquacultural production or assist in environmental consulting. Until now, published solubility information has not been available in a consistent and uniform manner in one location. This book presents solubility concentrations of major atmospheric gases (oxygen, nitrogen, argon, carbon dioxide), noble gases (helium, neon, krypton, xenon), and trace gases (hydrogen, methane, nitrous oxide) as a function of temperature, salinity, pressure, and gas composition in a variety of formats. Data, equations, and theory are explained so that the user is able to understand the calculations and problems. Furthermore, data and solubility information are presented in a range of units to make them accessible across disciplines. This book will help the reader to look at a problem from a quantitative viewpoint and better understand carbonate chemistry. Revised from the earlier edition to include more accurate carbon dioxide tables and separate sections on the solubility of noble gases, trace gases, and oxygen in brines to provide a single resource for gas solubility data. This book is essential for all students and practitioners working in aquatic fields.

### **From reader reviews:**

#### **Velma Stuart:**

The e-book with title Dissolved Gas Concentration in Water: Computation as Functions of Temperature, Salinity and Pressure possesses a lot of information that you can find out it. You can get a lot of benefit after read this book. That book exist new information the information that exist in this reserve represented the condition of the world currently. That is important to yo7u to know how the improvement of the world. This particular book will bring you with new era of the internationalization. You can read the e-book on your own smart phone, so you can read this anywhere you want.

#### **Adria Jenkins:**

Are you kind of hectic person, only have 10 or maybe 15 minute in your morning to upgrading your mind skill or thinking skill possibly analytical thinking? Then you are having problem with the book when compared with can satisfy your small amount of time to read it because all of this time you only find book that need more time to be read. Dissolved Gas Concentration in Water: Computation as Functions of Temperature, Salinity and Pressure can be your answer given it can be read by you actually who have those short time problems.

#### **David Hedges:**

This Dissolved Gas Concentration in Water: Computation as Functions of Temperature, Salinity and Pressure is brand-new way for you who has intense curiosity to look for some information mainly because it relief your hunger of knowledge. Getting deeper you in it getting knowledge more you know or perhaps you who still having bit of digest in reading this Dissolved Gas Concentration in Water: Computation as Functions of Temperature, Salinity and Pressure can be the light food to suit your needs because the information inside this kind of book is easy to get simply by anyone. These books produce itself in the form that is reachable by anyone, yep I mean in the e-book contact form. People who think that in publication form make them feel drowsy even dizzy this book is the answer. So there is absolutely no in reading a reserve especially this one. You can find actually looking for. It should be here for you. So , don't miss the item! Just read this e-book type for your better life in addition to knowledge.

#### **Keith Vanwagoner:**

You can find this Dissolved Gas Concentration in Water: Computation as Functions of Temperature, Salinity and Pressure by check out the bookstore or Mall. Only viewing or reviewing it might to be your solve trouble if you get difficulties for ones knowledge. Kinds of this publication are various. Not only through written or printed and also can you enjoy this book by e-book. In the modern era like now, you just looking of your mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still up-date. Let's try to choose appropriate ways for you.
