Information Technology Law

Ian J. Lloyd

Information Technology Law Ian J. Lloyd
"Information Technology and the Law" examines the national and international basis for action on such topics as data protection and computer crime, analyzing the effectiveness of current intellectual property legislation, and addressing the prospects for the UK's Data Protection Act and Computer Misuse Act, and current and proposed EEC Directives on data and software protection. Detailed consideration is also given to the increasingly important liability issues which may arise when the operation of IT equipment results in injury or damage. The book should be of value to students, legal practitioners and to those responsible for the management and operation of IT systems.

From reader reviews:

James Marcotte:

Book is to be different for every grade. Book for children until finally adult are different content. As you may know that book is very important for people. The book Information Technology Law seemed to be making you to know about other knowledge and of course you can take more information. It doesn't matter what advantages for you. The publication Information Technology Law is not only giving you more new information but also to be your friend when you truly feel bored. You can spend your current spend time to read your reserve. Try to make relationship with the book Information Technology Law. You never sense lose out for everything if you read some books.

Abel Cooke:

As people who live in the particular modest era should be upgrade about what going on or facts even knowledge to make these keep up with the era and that is always change and move ahead. Some of you maybe will update themselves by reading through books. It is a good choice in your case but the problems coming to a person is you don't know what type you should start with. This Information Technology Law is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and wish in this era.

Ronald Malone:

Information is provisions for individuals to get better life, information these days can get by anyone on everywhere. The information can be a know-how or any news even a concern. What people must be consider whenever those information which is inside the former life are difficult to be find than now is taking seriously which one is acceptable to believe or which one the actual resource are convinced. If you have the unstable resource then you buy it as your main information you will see huge disadvantage for you. All those possibilities will not happen in you if you take Information Technology Law as the daily resource information.

Elizabeth Acker:

As a pupil exactly feel bored for you to reading. If their teacher inquired them to go to the library or to make summary for some publication, they are complained. Just minor students that has reading's heart and soul or real their passion. They just do what the educator want, like asked to go to the library. They go to at this time there but nothing reading critically. Any students feel that reading through is not important, boring as well as can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Information Technology Law can make you feel more interested to read.
