OpenStreetMap in GIScience: Experiences, Research, and Applications (Lecture Notes in Geoinformation and Cartography)

OpenStreetMap in GIScience: Experiences, Research, and Applications (Lecture Notes in Geoinformation and Cartography)

This edited volume presents a collection of lessons learned with, and research conducted on, OpenStreetMap, the goal being to promote the project's integration. The respective chapters address a) state-of-the-art and cutting-edge approaches to data quality analysis in OpenStreetMap, b) investigations on understanding OpenStreetMap contributors and the nature of their contributions, c) identifying patterns of contributions and contributors, d) applications of OpenStreetMap in different domains, e) mining value-added knowledge and information from OpenStreetMap, f) limitations in the analysis OpenStreetMap data, and g) integrating OpenStreetMap with commercial and non-commercial datasets. The book offers an ideal opportunity to present and disseminate a number of cutting-edge developments and applications in the field of geography, spatial statistics, GIS, social science, and cartography.

From reader reviews:

Mildred Duncan:

With other case, little persons like to read book OpenStreetMap in GIScience: Experiences, Research, and Applications (Lecture Notes in Geoinformation and Cartography). You can choose the best book if you want reading a book. Provided that we know about how is important a book OpenStreetMap in GIScience: Experiences, Research, and Applications (Lecture Notes in Geoinformation and Cartography). You can add information and of course you can around the world by a book. Absolutely right, since from book you can learn everything! From your country until foreign or abroad you can be known. About simple matter until wonderful thing you are able to know that. In this era, we can easily open a book as well as searching by internet device. It is called e-book. You should use it when you feel bored stiff to go to the library. Let's read.

Dennis Fleenor:

Book is to be different per grade. Book for children until adult are different content. As you may know that book is very important usually. The book OpenStreetMap in GIScience: Experiences, Research, and Applications (Lecture Notes in Geoinformation and Cartography) ended up being making you to know about other knowledge and of course you can take more information. It is very advantages for you. The e-book OpenStreetMap in GIScience: Experiences, Research, and Applications (Lecture Notes in Geoinformation and Cartography) is not only giving you much more new information but also to become your friend when you feel bored. You can spend your spend time to read your guide. Try to make relationship together with the book OpenStreetMap in GIScience: Experiences, Research, and Applications (Lecture Notes in Geoinformation and Cartography). You never experience lose out for everything in case you read some books.

Patricia Clay:

This OpenStreetMap in GIScience: Experiences, Research, and Applications (Lecture Notes in Geoinformation and Cartography) book is not really ordinary book, you have it then the world is in your hands. The benefit you have by reading this book is usually information inside this book incredible fresh, you will get information which is getting deeper anyone read a lot of information you will get. This specific OpenStreetMap in GIScience: Experiences, Research, and Applications (Lecture Notes in Geoinformation and Cartography) without we know teach the one who studying it become critical in thinking and analyzing. Don't always be worry OpenStreetMap in GIScience: Experiences, Research, and Applications (Lecture Notes in Geoinformation and Cartography) can bring when you are and not make your carrier space or bookshelves' become full because you can have it in the lovely laptop even cellphone. This OpenStreetMap in GIScience: Experiences, Research, and Applications (Lecture Notes in Geoinformation and Cartography) having great arrangement in word and layout, so you will not truly feel uninterested in reading.

Sharon Garcia:

As we know that book is essential thing to add our information for everything. By a publication we can know everything we would like. A book is a range of written, printed, illustrated or even blank sheet. Every year seemed to be exactly added. This guide OpenStreetMap in GIScience: Experiences, Research, and Applications (Lecture Notes in Geoinformation and Cartography) was filled about science. Spend your free time to add your knowledge about your technology competence. Some people has distinct feel when they reading any book. If you know how big benefit of a book, you can really feel enjoy to read a publication. In the modern era like currently, many ways to get book which you wanted.
