Signal Processing in Radar Systems

Vyacheslav Tuzlukov

Signal Processing in Radar Systems Vyacheslav Tuzlukov

An essential task in radar systems is to find an appropriate solution to the problems related to robust signal processing and the definition of signal parameters. **Signal Processing in Radar Systems** addresses robust signal processing problems in complex radar systems and digital signal processing subsystems. It also tackles the important issue of defining signal parameters.

The book presents problems related to traditional methods of synthesis and analysis of the main digital signal processing operations. It also examines problems related to modern methods of robust signal processing in noise, with a focus on the generalized approach to signal processing in noise under coherent filtering. In addition, the book puts forth a new problem statement and new methods to solve problems of adaptation and control by functioning processes. Taking a systems approach to designing complex radar systems, it offers readers guidance in solving optimization problems.

Organized into three parts, the book first discusses the main design principles of the modern robust digital signal processing algorithms used in complex radar systems. The second part covers the main principles of computer system design for these algorithms and provides real-world examples of systems. The third part deals with experimental measurements of the main statistical parameters of stochastic processes. It also defines their estimations for robust signal processing in complex radar systems.

Written by an internationally recognized professor and expert in signal processing, this book summarizes investigations carried out over the past 30 years. It supplies practitioners, researchers, and students with general principles for designing the robust digital signal processing algorithms employed by complex radar systems.

From reader reviews:

Karole Standley:

Often the book Signal Processing in Radar Systems will bring someone to the new experience of reading a new book. The author style to describe the idea is very unique. Should you try to find new book to read, this book very suitable to you. The book Signal Processing in Radar Systems is much recommended to you to read. You can also get the e-book in the official web site, so you can quickly to read the book.

Lisa McCann:

The particular book Signal Processing in Radar Systems has a lot associated with on it. So when you make sure to read this book you can get a lot of benefit. The book was authored by the very famous author. The writer makes some research previous to write this book. This kind of book very easy to read you may get the point easily after reading this article book.

Olive Wilson:

Playing with family within a park, coming to see the ocean world or hanging out with good friends is thing that usually you will have done when you have spare time, and then why you don't try matter that really opposite from that. One particular activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Signal Processing in Radar Systems, you could enjoy both. It is fine combination right, you still would like to miss it? What kind of hangout type is it? Oh occur its mind hangout folks. What? Still don't obtain it, oh come on its named reading friends.

Brad Sharpe:

Signal Processing in Radar Systems can be one of your beginner books that are good idea. All of us recommend that straight away because this publication has good vocabulary which could increase your knowledge in vocab, easy to understand, bit entertaining but delivering the information. The author giving his/her effort to place every word into pleasure arrangement in writing Signal Processing in Radar Systems however doesn't forget the main place, giving the reader the hottest in addition to based confirm resource details that maybe you can be one among it. This great information can drawn you into new stage of crucial imagining.
