An experienced team of authors is compiling these reviews every year, so that the reader can rely on a continuing quality of selection and presentation. As a new service to the reader all reaction mechanisms leading to stereospecific products are highlighted. This reflects the needs of the organic synthetic community with leads to chiral reactions.

Detailed author and subject indexes help the reader to find the information they are looking for.

As a new service to the reader all mechanisms featuring 'Enantiospecific and diastereospecific' reactions are highlighted. This reflects the interest of synthetic organic chemists in such reactions and the pharmaceutical role of chiral molecules.
