Alaska and Siberia, separated only by 55 miles of Bering Sea- with some of the smaller islands in the straits as close to each other as only 2 miles - have all through the ages shared their ancestry, a way of living and their life-preserving dogs. Some 35,000 years ago the people of Central Asia migrated farther and farther north to the extreme-most regions of Siberia and the Arctic, and brought with them their jackal-type dogs. Cross-bred with the Arctic wolves, these animals developed over the centuries into what later came to be referred to as the Northern breeds, including the Malamute, Samoyeds, the Spitz, Keeshonda, Elkhoundas, the Nootka dogs of Iceland and the Russian Laikas.
