Basic Statistics

B. L. Agarwal

Basic Statistics B. L. Agarwal

This is the first international edition of a successful textbook with an outstanding pedigree. It covers a wide range of statistical theory commonly taught in faculties worldwide. This theory is followed by relevant formulae, which are fully supported by solved numerical problems. However no advanced knowledge of mathematics is required. The content is divided into 24 chapters, with problems and exercises to be tackled using SPSS. Two chapters - Research Processes and Experimental Research Designs - ensure that the book can be used in its entirety as a course text, but it is equally valuable to academics and students as a reference work to be consulted on a chapter by chapter basis.

CONTENTS

Status of Statistics * Classification, Tabulation and Graphical Representation * Measures of Central Values * Measures of Dispersion * Elementary Probability * Random Variable and Probability Distributions * Sampling and its Uses * Some Sampling Distributions * Research Processes * Test of Significance * Chi-Square and F-Test * Experimental Research Designs * Nonparametric Tests * Association of Attributes * Regression and Correlation * Multivariate Regression and Correlation * Time Series Analysis * Index Numbers * Interpolation and Extrapolation * Elementary Decision Theory * Statistical Quality Control * Statistical Organisation in India * Business Forecasting * Vital Statistics

Appendix A: Mathematics for Statistics

Appendix B: Statistical Tables

Answers to Numerical Problems

KEY SELLING POINTS

1. Successful textbook with proven sales history
2. Comprehensive, multi discipline
3. Mathematically undemanding

Anshan Publishers is a publisher of fine medical, scientific, and technical books. We find the best titles from our worldwide publishing partners and bring them to the global marketplace.
