JavaFX Script: Dynamic Java Scripting for Rich Internet/Client-side Applications (FirstPress) James Weaver

JavaFX Script makes it easy for developers to quickly create high-quality user interface-intensive applications very quickly. As *JavaFX Script: Dynamic Java Scripting for Rich Internet/Client-side Applications* demonstrates, developers can create rich Internet applications and rich client-side user interfaces quickly and easily with this potential replacement for Ajax and perhaps even ActionScript and other scripting found in Flash. This firstPress book on JavaFX Script covers the following topics:

- The fundamentals of the JavaFX suite of technologies and the foundations of JavaFX Script and available tools
- How to create a Wordsearch application
- How to augment and enhance the Wordsearch application after learning more advanced JavaFX Script features such as classes, objects, user interface components, and constructs

What you'll learn

- Understand the JavaFX family and JavaFX Script and its relationship to the Java/Java SE 6 platform
- Set up a JavaFX Script development and execution environment culminating in a Hello JFX application
- Create a Wordsearch application and explore important JavaFX Script concepts by doing so
- Survey the JavaFX UI Components including the commonly used ones that go into further building and enhancement of the Wordsearch application frame and menu structure
- Use more advanced JavaFX Script language constructs for extending the Wordsearch application
- Build JavaFX classes and objects, build the data model for the WordSearch application, and run the data model with a tester program
- Develop the view for the Wordsearch application using a data model such as bind as well as drawing on a canvas
- Explore more JavaFX Script concepts and possible IDE tie-ins to NetBeans, Eclipse, etc.

Who this book is for

This book is for content developers and application developers with some programming experience who want to create rich Internet applications.

Table of Contents

1. Introduction to JavaFX
2. Quick Start
3. Creating User Interfaces in JavaFX
4. Creating JavaFX Classes and Objects
5. More UI Fun Including 2D Drawing
