Differential Forms and Applications (Universitext)

Manfredo P. Do Carmo

Differential Forms and Applications (Universitext) Manfredo P. Do Carmo

An application of differential forms for the study of some local and global aspects of the differential geometry of surfaces. Differential forms are introduced in a simple way that will make them attractive to "users" of mathematics. A brief and elementary introduction to differentiable manifolds is given so that the main theorem, namely Stokes' theorem, can be presented in its natural setting. The applications consist in developing the method of moving frames expounded by E. Cartan to study the local differential geometry of immersed surfaces in \mathbb{R}^3 as well as the intrinsic geometry of surfaces. This is then collated in the last chapter to present Chern's proof of the Gauss-Bonnet theorem for compact surfaces.

From reader reviews:

Genoveva Johnson:

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to be aware of everything in the world. Each e-book has different aim or even goal; it means that guide has different type. Some people truly feel enjoy to spend their time for you to read a book. These are reading whatever they acquire because their hobby is actually reading a book. How about the person who don't like studying a book? Sometime, particular person feel need book if they found difficult problem as well as exercise. Well, probably you should have this Differential Forms and Applications (Universitext).

Brent Cook:

What do you think of book? It is just for students since they're still students or the item for all people in the world, what best subject for that? Just you can be answered for that issue above. Every person has distinct personality and hobby for every single other. Don't to be forced someone or something that they don't wish do that. You must know how great in addition to important the book Differential Forms and Applications (Universitext). All type of book is it possible to see on many sources. You can look for the internet solutions or other social media.

Rose Sosa:

A lot of people always spent their particular free time to vacation or maybe go to the outside with them friends and family or their friend. Do you realize? Many a lot of people spent they will free time just watching TV, or maybe playing video games all day long. If you want to try to find a new activity honestly, that is look different you can read a book. It is really fun for yourself. If you enjoy the book that you read you can spent 24 hours a day to reading a reserve. The book Differential Forms and Applications (Universitext) it is quite good to read. There are a lot of those who recommended this book. These folks were enjoying reading this book. In the event you did not have enough space bringing this book you can buy often the e-book. You can m0ore quickly to read this book from a smart phone. The price is not very costly but this book possesses high quality.

Alberto Redden:

Playing with family within a park, coming to see the sea world or hanging out with close friends is thing that usually you have done when you have spare time, in that case why you don't try matter that really opposite from that. One particular activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition details. Even you love Differential Forms and Applications (Universitext), you are able to enjoy both. It is very good combination right, you still wish to miss it? What kind of hang type is it? Oh come on its mind hangout guys. What? Still don't understand it, oh come on its known as reading friends.
